DETAILED ACTION

Double Patenting

1. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

2. Claims 28-51 and 88 rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-25 of prior U.S. Patent Application No. 11/523,169 (currently allowed). This is a double patenting rejection.

Claims 28-51 and 88 of the claimed invention are identical to claims 1-25 of App. No. 11/523,169.

Allowable Subject Matter

3. Claims 53-59, 61-67, 69-75, 97-103, 105-111, and 113-119 are allowed.

Regarding Claims 54, 62, and 70, Yip and Chan do not teach, alone nor in combination, a feedback element in communication with the output terminal and the second polarity input terminal, a first resistor in communication with the second polarity input terminal and the measured/composite signal, and a second resistor in communication with the second polarity input terminal and the filtered replica transmission signal.

Regarding Claims 97, 105, and 113, Yip and Patel do not teach, alone nor in combination, a feedback element in communication with the output terminal and the second polarity input terminal, a first resistor in communication with the second polarity input terminal and the composite signal, and a second resistor in communication with the second polarity input terminal and the filtered replica transmission signal.

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
